### Automatic Traffic Counts

When Suffolk County Council built its strategic highway model, data was collected from various locations around the county. One location exists on the A1152 to the southwest of the Bent waters Business Park roundabout. The data from this location is summarised below for comparison with the data collected most recently. A similar level of weekly traffic is observed at approximately 40,000 PCUs passing along the corridor and heavy goods vehicle numbers (OGV1 & OGV2 and Class 3-11) ranging from 1000 to 2000.

The count site location is illustrated below:

### 2016 Automatic Traffic Counts (1 week):

Day	Total	Class 1	Class 2	Class 3-11	Class 12	Class 2%	Class3-11A%	Class 12%

### Junction capacity

ISPA9 flows indicated the junction is not near capacity, with the 2026 (no adjustments) stating 45.55% utilisation and the 2036 (no adjustments) seeing utilisation at 51.67%. Both figures sitting far below the 85% threshold.

### Carriageway capacity

Using ISPA9 traffic flows for the AM peak and refining the data to demonstrate the route capacities with PCUs, there are no concerns from the data observed.

## Bentwaters Business Park roundabout: Junction A1152-B1069

### Road Safety

Using SCRIM data and GPS position, five road traffic collisions have been logged, two serious and three slight since 2016. Without having further information into the consistency and details of this collisions it is likely the junction is a low-risk area for road traffic collisions.

### Additional Traffic Data - 2016 and 2023
